An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John Griffith on August 24, 2005.

Claim 8: (Amended) An object based computing system, the object based computing system comprising:

a memory, the memory including a plurality of address locations;

at least one thread;

a plurality of objects, the plurality of objects including at least one object which is accessible to the at least one thread, wherein each of the plurality of objects is associated with a corresponding address of the plurality of address locations;

at least one lock, the at least one lock being accessible to the at least one object and being held by at least one locking thread, wherein the at least one lock can be released such that the object is not locked by any locking thread in response to a determination that the at least one locking thread is the same thread as the at least one thread; and

a data structure, the data structure being arranged to associate the at least one lock with at least one corresponding address location selected from the plurality of address locations, wherein the data structure is arranged to be accessed by the at least one thread using a first value associated with the at least one object to identify the at least one lock.

Claim 17: (Amended) A data structure for use in a multi-threaded object-based computing system, the data structure being arranged to be stored in a memory of the computing system, the data structure comprising:

A plurality of index values; and

A plurality of lock identifiers, each lock identifier included in the plurality of lock identifiers being arranged to identify an associated lock in the computing system, wherein the
